

1. Principal Japanese Equity Fund - A Class Acc Unit will invest principally in the equity securities of companies domiciled or with their core businesses in Japan. The fund invests in a single country. Compared with a well-diversified fund, its concentration risk is relatively high and hence it might be more volatile than a well-diversified fund.
2. Investment in these funds may involve a high degree of risk. Hence these funds may not be suitable for everyone. There is no assurance on investment returns and your investments/accrued benefits may suffer significant loss.
3. You should consider your own risk tolerance level and financial circumstances before making any investment choice. When, in your selection of funds, you are in doubt as to whether a certain fund is suitable for you (including whether it is consistent with your investment objectives), you should seek financial and/or professional advice and choose the fund(s) most suitable for you taking into account your circumstances.
4. You should not invest solely in reliance on this marketing material alone. You should read the Principal Brochure of the MPF funds and the Summary Prospectus of the mutual funds for further details (including investment policy, risk factors, fees and charges, and fund information).

## Our Achievements, Your Trusted Partner!
